Texture resolution: 2048x2048

Texture maps included: Albedo (Base Color), Normal Map

Materials: 1 material per mesh (optimized for performance)

UVs: Non-overlapping, optimized for game use

--- IMPORTANT ---

To interact with the sample demo, make sure the new Input System package is installed and enabled before importing the package.

You can install it from the Package Manager by going to Window > Package Manager, then searching for and installing the "Input System" package.

After installation, Unity will prompt you to enable the new Input System. Click "Yes" and allow Unity to restart.

You can also enable it manually by going to Edit > Project Settings > Player > Active Input Handling, then selecting either "Input System Package (New)" or "Both" for compatibility.
